PROFESSIONAL SUMMARY

Software developer with experience building React web applications and React Native mobile apps, including digital learning platforms and early-stage products. Worked with cross-functional teams on responsive interfaces, performance improvements, and maintainable frontend code. Additional full-stack training in Angular, .NET Core, API development, and database design.

EXPERIENCE

Front-End Developer | eMicrolearn (Subsidiary of Pitman)

Remote | Dec 2022 - Jul 2025

- Developed responsive React interfaces for iBook, a digital learning platform.
- Worked with cross-functional teams to deliver features, improve application performance, and support user engagement.
- Maintained scalable frontend code using React, JavaScript, HTML, and CSS.

React Developer | HexaSol

Jenin, Palestine | Nov 2022 - Apr 2023

- Developed and maintained React web applications with a focus on performance and responsiveness.
- Led frontend development for Hakini, a React Native mobile application, and built the AZEZA mobile MVP.
- Participated in code reviews and shared technical knowledge with the development team.

Full-Stack Developer Trainee | IConnect Tech

Ramallah, Palestine | Aug 2022 - Oct 2022

- Completed practical training in Angular and .NET Core, building projects that connected frontend interfaces with backend services.
- Worked on API development, database design, and frontend-backend integration under technical mentorship.

TECHNICAL SKILLS

Languages: JavaScript, C#, C++, Dart

Frontend & Mobile: React, React Native, Angular, HTML5, CSS3, Flutter

Backend & Data: .NET Core, Firebase, MongoDB, SQL Server, REST APIs

Development Practices: Object-oriented programming, data structures, Agile methodologies, problem solving, collaboration, communication

SELECTED PROJECTS

Apartment Reservation App: Built a Flutter app with real-time booking and a user-friendly interface.

Authentication Modules: Implemented secure login and signup flows with React Native.

Online Store: Built an ASP.NET Core 6 web application with product management and payment integration.

Guessing Game & React POC: Created a React Native game with interactive gameplay and animations, and a React proof of concept to evaluate design approaches.

EDUCATION

Bachelor of Computer System Engineering | Arab American University, Jenin, Palestine

LANGUAGES

Arabic: Native | English: Professional working proficiency
